

Dear Hiring Manager,

I am delighted and proud to recommend Mr. Mitra Boga for the internship opportunity with your well-reputed organization.

I am Dr. Jadav Ganesh, Associate Professor, Department of Mathematics, GITAM (Deemed to be University). As his faculty, I taught him Discrete Mathematics (MATH1041) and Graph Theory (MATH1051). I can most definitely vouch for his academic and personal skills.

Mitra possesses the resilience, intellect, analytical skills, leadership acumen, integrity, and discipline required to excel in advanced mathematics. His tenacity is something to be appreciated as it is a valuable skill that enables him to tackle any obstacle positively. His passion for mathematics and engineering will enable him as a skilled engineer in the future. Mitra always sat in the first row to avoid distractions and actively participate during class discussions. This dedication is what allows him to prioritize well and, thus, succeed.

During his time as my student, he has consistently demonstrated tenacious efforts and remarkable performance in Discrete Mathematics and Graph Theory (MATH1041/1051). He is easy to get along with, and very respectful yet stands his ground for what he deserves.

As an aspiring Engineer, the internship at your organization would provide Mitra Boga with an opportunity to showcase and improve upon his natural talents and allow you to practically experience what Mitra has learnt theoretically. I am confident that his tenacity will prove to support any organization's endeavours and even bring new value. I strongly recommend Mitra without any reservations.
